

First Announcement

4th POSTGRADUATE RESEARCH SYMPOSIUM 18 July 2014

The Centre for Renewable and Sustainable Energy Studies (CRSES) is hosting its bi-annual national symposium to provide masters' and doctoral students with the opportunity to present their research, after completion or while still in progress. The symposium will take place on **18 July 2014** in room K302 at the Engineering Knowledge Centre, Faculty of Engineering, Stellenbosch University. This symposium will follow directly after the **Solar Thermal Research Groups' symposium that will take place on 17 July** and which focuses on solar thermal energy only.

In 2014 the focus of the symposium will thus be on wind, ocean, bio-energy and solar PV. The programme will be communicated in due course.

All academics and students with an interest in renewable and sustainable energy are welcome to attend. Limited sponsorships will be made available to students from outside the Western Cape who require assistance with travel and accommodation and who attend and present a paper in one of the focus areas.

Students that will present their work will be required to abstracts that will be published on our website at: <http://crses.sun.ac.za/service-conferences.php>. Abstracts will be published in the conference proceedings. To this end, a call for abstracts will be circulated in **April 2014**.

Students who are interested to participate are requested to e-mail their contact information and provisional titles to Me Sandy Heydenrycht by the end of March 2014 at crses@sun.ac.za
